

October 5, 1965

MEMO

FOOTBRIDGE:

Called Edelman's office and spoke to Cleo. She tried to give me the old routine about things being in a mess. I refused to accept her statement and insisted that she get out the files on the footbridge. She was reluctant, but when I told her that I was aware that she was in the office during Mrs. Wyman's term, she became a little more cooperative. Her files indicate the following:

Council Action                      April 14, 1965

Letter to Arnbergh                  April 27, 1965

Then called Chas. W. Sullivan (Arnebergh's office - Ext. 1441) to inquire what action they had taken after receiving Wyman's letter. He was most cooperative and had knowledge of the project. He wrote to the Public Utilities Commission on July 20, 1965 stating the facts; a copy went to Pacific Electric asking for their confirmation that they had no objections.

(called Pat Flanigan asking for name of contact at Pacific Electric)

Pat was unable to find the name of the man to call. She did call Mr. Lopez at the office of the Director of Right of Way and Land. He informed her that at the time P.E. received the letter, they were in the midst of a merger with Southern Pacific. Because P.E. was now a new entity, his office had to submit a new letter asking for written confirmation of no objection to the bridge. This was done on September 3rd and directed to Mr. Young.

Mr. Lopez was to contact Mr. Young and call back to Pat.
